

- 1 Prove by mathematical induction that, for all positive integers n , $5^{3n} + 32^n - 33$ is divisible by 31. [6]

This image shows a full page of a handwriting practice worksheet. It consists of approximately 20 horizontal rows. Each row is defined by two parallel dashed lines, creating a series of uniform gaps for letter height. The lines are evenly spaced across the entire page, providing a guide for consistent letter formation. There is no text or other markings on the page.
