

Find a 95% confidence interval for the difference between the mean number of pine trees in regions of this size in countries A and B . [7]

[illegible]

The scientist also chooses a random sample of 12 fish of this type from lake B , but he only has a summary of their masses, y kg, as follows.

Test at the 10% significance level whether the mean mass of fish of this type in lake A is greater than the mean mass of fish of this type in lake B . You should state any assumptions that you need to make for the test to be valid. [10]

[illegible]
